

MI Ecosystem Company

About US

MadV Technology was established in April 2015, it became a Mi Eco-system Company in July the same year. As a high-tech company which is dedicated in Sphere Image and Video solution, MadV's vision is to make the sphere technology part of people's daily life by recording their life in a thrilled new way without missing any tiny details within their surroundings, help people capture, create and share their unforgettable sphere memories anywhere and anytime they want to.

Mi Sphere Camera is the first product MadV team developed and launched into China market. MadV team's hard work turns their first product to a new bench mark in the market with high end specification such as 24MP video resolution, 7K image resolution, sleek design, light weight, IP67 level dust and water resistance. MadV believes their first product will make itself a pioneer in continuing to grow sphere consumer market.
