

YIHALO

The most advanced 3D-360 camera

Yi Technologies and Google's Jump team are working together from I/O 2016 held by Google in San Francisco, California.

The spec to price ratio of the Yi 4K Action Camera seems to be exactly what Google was looking for when it partnered with Yi. New Jump VR rig use multiple Yi 4K Action Cameras instead of GoPros.

# SEE EVERYTHING

YI HALO have long battery life, live preview via mobile app, plus an up camera, the YI HALO allows you to capture even more of the world in VR.

# SHOOTING VR WITH PEACE OF MIND

The built-in near real-time monitoring system includes a dashboard and issues smart alerts if it detects that a micro SD card is nearly full, battery power is low or other similar issues to minimize downtime and protect your recordings.

# STITCHING MADE EASY WITH JUMP ASSEMBLER

YI HALO is fully compatible and fully optimized for Jump Assembler. The metadata generated by YI HALO helps Jump understand the shooting situation in every detail and do the best job in stitching. The stitching workflow is completely automatic so you're free to concentrate on your shoot.

# TRUSTWORTHY AND RELIABLE

The YI HALO has gone through more than 100K total hours of stress testing to verify its reliability.

Built by the same engineering team who built the award winning YI 4K action camera and the world's first 4K/60fps action camera YI 4K+ action camera, the YI HALO's mechanical structure, hardware, firmware and software are carefully designed and implemented to deal with the rigors of shooting.

# DESIGNED FOR FULLY IMMERSIVE CREATIVITY

We worked to meet the promise and challenge VR poses for creators to craft truly immersive experiences.

It is the first camera with an up camera (total of 17 unit cameras), allowing users to experience the scene in every direction without missing a thing.

# DELIVERS VIVID 3D-360°

\*Image is for illustrative purposes only.

- The YI HALO's innovative geometry was designed with stitching in mind. As the newest Jump camera, it was built to work with Jump Assembler. Together they can produce high quality stitches and deliver high quality stereo VR content up to 8K x 8K.

# ADVANCED IMAGE QUALITY SETTINGS FOR PROFESSIONALS

Advanced image quality settings such as ISO, WB, EV, shutter and flat color are supported in YI HALO to empower filmmakers to capture the most spectacular moments accurately.

# READY FOR THE FUTURE

Technology advances every single minute. You won't get left behind. We designed the YI HALO to be modular and upgradeable. When new firmware is released, you can upgrade all cameras at once with just a few clicks on the control panel.

# KEEP ROLLING

The included rechargeable battery lasts over 100 minutes during continuous shooting and can be swapped with a spare. The included AC Adapter can power the YI HALO and also charge the battery at the same time.

# GREAT THERMAL PERFORMANCE

A sophisticated passive thermal design coupled with the advanced low power Ambarella A9SE75 SOC allows YI HALO to operate in warm environments, up to 35°C, without overheating.

# TAKE THE SHOW ON THE ROAD, AND OFF

Weighing less than 8 pounds you won't need to hire a sherpa to haul your YI HALO. With the built-in handle, 1/4" and 3/8" tripod sockets, the YI HALO can be mounted to most tripods and camera support systems. It comes in a rugged and custom Pelican 1610 case for handling the worst conditions.

# EASY, TOTAL CONTROL

Built-in 5GHz Wi-Fi allows you to securely and remotely control your YI HALO with the Android smartphone App. You don't need to be at the camera to set up and shoot. The app also lets you preview so that you get the right shot every time. YI HALO also comes with a built-in LCD touch screen control panel.

# VIEW IT IN 360°

# A COMPLETE PACKAGE

YI HALO×1

Backup Camera×2

Battery×1

MicroSD Card Case×1

Bluetooth Remote Control×1

Charger & Charger Power Cable×1

Screwdriver×2

Backup cable pack

Power cable×1
